

NAVANEETH M

Data Analyst | SQL · Python · Power BI · Tableau

+91 9008146587 • navaneethm1707@gmail.com • linkedin.com/in/navaneethm1707 • github.com/Navaneeth1707 • Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience across SQL, Python, and Power BI, including internships at LLRI and InvenTeron delivering 4+ dashboards for cross-functional teams. Built 5 end-to-end portfolio projects spanning datasets up to 1M+ rows — data cleaning, RFM segmentation, churn modeling, and financial risk analysis — with a consistent focus on data quality, defensible methodology, and business-ready insight delivery.

TECHNICAL SKILLS

Databases & Reporting: SQL / MySQL, Relational Databases, Power BI, Tableau, Excel, DAX / Power Query

Data Quality & Warehousing: Data Cleaning, Data Integrity, ETL / ELT, BI Concepts / DWH, Window Functions, CTEs

Analysis & Programming: Python, Pandas / NumPy, Scikit-learn, Jupyter, Statistics, EDA

Tools & Version Control: Git / GitHub, Google Colab, VS Code, Feature Engineering, Machine Learning

WORK EXPERIENCE

Data Analyst Intern • LLRI, Bengaluru

Jul 2024 – Feb 2025 (8 months)

- Delivered a 4-page Power BI dashboard tracking EV adoption trends across 2022–2024 (57M vehicle records, 2M EVs), enabling state-wise and maker-level decision-making for stakeholders.
- Ran structured QA and data cleaning checks in Excel and Python before dashboard delivery, catching and resolving data errors ahead of stakeholder review across 8 months of deliverables.
- Built the reporting pipeline end-to-end — SQL extraction, Python transformation, Excel validation — maintaining data integrity across a live data warehouse environment.

Data Science Intern • InvenTeron Technologies & Business Solutions LLP, Bengaluru

Feb 2025 – May 2025

- Identified and corrected data quality issues (nulls, duplicates, inconsistent fields) across 50,000+ transaction records prior to model training, improving input data reliability for downstream modeling.
- Translated analytical findings into non-technical Power BI reports for cross-functional stakeholders, supporting the adoption of dashboard insights in planning decisions.
- Gathered stakeholder requirements across sales and customer feedback datasets to align reporting outputs with business need.

RELEVANT PROJECTS

RFM Customer Segmentation

Aug 2025

SQL / MySQL · SQLAlchemy · Python · Power BI | github.com/Navaneeth1707/rfm-customer-segmentation

- Segmented 5,878 customers from a 1.07M-row transactional dataset into 9 behavioral groups using Recency, Frequency, and Monetary scoring; replaced NTILE() with PERCENT_RANK() to fix a tie-handling bias affecting 1,623 customers.
- Found that 26% of customers (Champions) generated 71% of total revenue; delivered a 3-page interactive Power BI dashboard with segment-level retention recommendations.

Customer Churn Prediction & Retention Strategy

May 2025

Python · Scikit-learn · Power BI · Excel | github.com/Navaneeth1707/customer-churn-prediction

- Achieved 93% recall and identified \$139.88K in revenue-at-risk across 7,043 customers via a tuned Logistic Regression model with a cost-optimal decision threshold, delivered as a 3-page Power BI dashboard.

India Corporate Financial Stress — Early Warning System

Jun 2025

Python · SQL · XGBoost · Power BI | github.com/Navaneeth1707/india-financial-stress-early-warning

- Built a distress risk model for 50 NSE-listed companies combining the Altman Z-Score with an XGBoost classifier; surfaced that 3 states account for 40%+ of the national stress index via SQL aggregation and a multi-page Power BI report.

India Job Market Analysis

2025

SQL / MySQL | github.com/Navaneeth1707

- Cleaned and analyzed 949 LinkedIn job postings using pure SQL — window functions, CTEs, and aggregate queries — to answer 6 business questions on hiring trends and skill demand.

EDUCATION & CERTIFICATIONS

B.E. — Computer Science & Engineering

SDM Institute of Technology (SDMIT), Ujire · Graduated June 2025

Certifications: Pro Advanced Diploma in Data Analytics (Zell) · IBM SQL and Relational Databases 101 · IBM Data Visualisation with Python · Power BI for Beginners · Python for Data Science (Infosys Springboard) · DP-900: Azure Data Fundamentals (Microsoft)
