

NAVANEETH M

Data Analyst | SQL · Python · Power BI · Tableau

+91 9008146587 • navaneethm1707@gmail.com • [LinkedIn](#) • [GitHub](#) • Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Data Analyst with internship experience in SQL, Python, Excel, and Power BI, focused on data cleaning, dashboard development, and business analysis. Experienced working with datasets up to 1M+ rows, building end-to-end analytical workflows, and translating findings into retention and risk recommendations stakeholders can act on. Seeking Data Analyst / BI Analyst opportunities.

TECHNICAL SKILLS

Data Analysis: EDA, Data Cleaning, Statistical Analysis, Correlation Analysis, KPI Analysis

SQL: MySQL, Joins, CTEs, Window Functions, Subqueries, Aggregations, Query Optimization

BI & Visualization: Power BI, DAX, Power Query, Tableau, Excel

Python: Pandas, NumPy, Scikit-learn, Jupyter

Data Pipelines: ETL / ELT, SQLAlchemy, Data Validation, Data Warehousing concepts

Tools: Git / GitHub, Google Colab, VS Code

WORK EXPERIENCE

Data Analyst Intern • *LLRI, Bengaluru*

Aug 2025 – May 2026 (8 months)

- Delivered a 4-page Power BI dashboard tracking EV adoption trends across 2022–2024 (57M vehicle records, 2M EVs), enabling state-wise and maker-level decision-making for stakeholders.
- Ran structured QA and data validation checks in Excel and Python before dashboard delivery, catching and resolving data errors ahead of stakeholder review across 8 months of deliverables.
- Built the reporting pipeline end-to-end — SQL extraction, Python transformation, Excel validation — maintaining data integrity across a live data warehouse environment.

Data Science Intern • *Inventeron Technologies & Business Solutions LLP, Bengaluru*

Feb 2025 – May 2025

- Identified and corrected data quality issues (nulls, duplicates, inconsistent fields) across 50,000+ transaction records prior to model training, improving input data reliability for downstream modeling.
- Translated analytical findings into non-technical Power BI reports for cross-functional stakeholders, supporting the adoption of dashboard insights in planning decisions.
- Gathered stakeholder requirements across sales and customer feedback datasets to align reporting outputs with business need.

RELEVANT PROJECTS

RFM Customer Segmentation

Aug 2026

SQL / MySQL · SQLAlchemy · Python · Power BI | github.com/Navaneeth1707/rfm-customer-segmentation

- Segmented 5,878 customers from a 1.07M-row transactional dataset into 9 behavioral groups using Recency, Frequency, and Monetary scoring; replaced NTILE() with PERCENT_RANK() to fix a tie-handling bias affecting 1,623 customers.
- Found that 26% of customers (Champions) generated 71% of total revenue, and recommended a segment-tiered retention strategy — prioritizing loyalty perks for Champions and win-back offers for At Risk customers — delivered via a 3-page interactive Power BI dashboard.

Customer Churn Prediction & Retention Strategy

May 2026

Python · Scikit-learn · Power BI · Excel | github.com/Navaneeth1707/telco-churn-analysis

- Rebuilt a leak-safe pipeline after identifying target-leakage columns inflating early results; ran 5-fold stratified cross-validation and hyperparameter tuning across Logistic Regression and Random Forest.
- Achieved 94% recall and an 84% reduction in retention-related costs via a tuned Random Forest model with a business-cost-optimized decision threshold, validated on held-out test data and delivered as a 3-page Power BI dashboard.

India Corporate Financial Stress — Early Warning System

Jun 2026

Python · SQL · XGBoost · Tableau | github.com/Navaneeth1707/india-financial-stress-early-warning

- Built a distress risk model for 50 NSE-listed companies combining the Altman Z-Score with an XGBoost classifier; identified that 3 states account for 40%+ of the national stress index, to help prioritize early financial intervention by region.

India Job Market Analysis

Jul 2026

SQL / MySQL · Power BI | github.com/Navaneeth1707/India-Job-Market-Analysis

- Cleaned and analyzed 949 LinkedIn job postings using pure SQL — window functions, CTEs, and aggregate queries — to answer 6 business questions on hiring trends and skill demand.

EDUCATION & CERTIFICATIONS

B.E. — Computer Science & Engineering

SDM Institute of Technology (SDMIT), Ujire · Graduated June 2025

Certifications: Pro Advanced Diploma in Data Analytics (Zell) · IBM SQL and Relational Databases 101 · IBM Data Visualisation with Python · Power BI for Beginners · Python for Data Science (Infosys Springboard) · DP-900: Azure Data Fundamentals (Microsoft)
